DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter in claim 8. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "network interface is configured for connections to a switching in an ISDN network".

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

2. Claims 1-10 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: In U.S. Patent 6,400,701 B2, Lin et al discloses a communication system transmitting voice data in packet (Fig. 5) comprising a radio base station 301 having an air interface for 516 for connecting to a mobile subscriber 501 and a network interface 523 for connecting to a communication network (col. 8 lines 52-67). However, the prior art of record fails to teach for the steps of or means for "wherein voice data to be transmitted in each case are transmitted within data packets to be transmitted asynchronously for the first and second partial connections", when such voice data to be transmitted is considered within the specific structure of the device recited in claim 1.
